

# BREAST CENTRES NETWORK

Synergy among Breast Units

## ★ Asklepios Paulinen Klinik Wiesbaden - Wiesbaden, Germany

### General Information

**New breast cancer cases treated per year** **203**

**Breast multidisciplinary team members** **13**

Radiologists, surgeons, pathologists, medical oncologists, radiotherapists and nurses

**Clinical Director:** Volker Heyl, MD

Our breast unit has been certified by the German Cancer Society (DKG) and the German Society of Senology (DGS) since 2008. In 2006 we have had the Eusoma initial accreditation.

Diagnostic and therapeutic procedures are performed daily under the responsibility of experts in their fields. An interdisciplinary pre- and postoperative tumorconference discusses all patients and give recommendations for further treatments. Furthermore there are several professionals for social care and health consultancy like psycho-oncologists, breast care nurses, social workers, physiotherapist, etc working for or inside our breast unit.

We are able to treat more than 40% of all cancer patients in clinical studies. It is worth also mentioning the professional structure of the study centre with its study nurses and study doctors.
