

BREAST CENTRES NETWORK

Synergy among Breast Units

😫 Hôpitaux Iris Sud - Ixelles - Brussels, Belgium

General Information

New breast cancer cases treated per year 150

Breast multidisciplinarity team members 12 Radiologists, surgeons, pathologists, medical oncologists, radiotherapists and nurses

Clinical Director: Buxant Frederic, MD, PhD

HIS is a 660-bed public hospital made up of four sites located throughout Southern Brussels. Our Breast Clinic has been registered by the official Belgian accreditation system since 2000 and participates in the national breast cancer screening program. Our multidisciplinary team (senologists, surgeons, oncologists, radiotherapy specialists, anatomo-pathologists, breast reconstructive surgeons, psychologists, physiotherapists, and specialized nurses) provides quality care to 150 new patients annually thanks to highly qualified staff and the latest-generation technological equipment. Support care, managed by a dedicated psychologist team, is an essential part of our patient-centred approach. We actively encourage expertise networks and professional exchanges: cases are discussed during weekly multidisciplinary oncological meetings to provide each patient's best treatment plan. Breast Clinic maintains partnerships with Bordet Institute (pathology, medical oncology and radiotherapy) and takes part in international multicenter protocols.

Breast Surgery

New operated cases per year (benign and malignant) 175
 Dedicated Breast Surgeons 2
 Surgeons with more than 50 surgeries per year 2
 Breast Surgery beds 5
 Breast Nurse specialists 1
 Outpatient surgery
 Intra-operative evaluation of sentinel node
 Reconstruction performed by Breast Surgeons
 Clinical Research

Primary technique for staging the axilla

- Axillary lymph node dissection
- Sentinel lymph node biopsy:
- Blue dye technique
- ✓ Radio-tracer technique
- Blue dye + Radio-tracer
- Axillary sampling

Reconstructive/Plastic Surgeons 1 Immediate Reconstruction available 1 Remodelling after breast-conserving surgery Reconstruction after mastectomy: Two-stage reconstruction (tissue expander followed by implant)

✓ One-stage reconstruction

🗹 Autogenous tissue flap

🗹 Latissimus dorsi flap

Transverse rectus abdominis (TRAM)

✓ Free-flaps (free TRAM, DIEP, SIEA, gluteal, etc.)

Surgery on the contralateral breast for symmetry

Pathology

Dedicated Breast Pathologists	2	Other special studies available
Available studies		Fluorescence in-situ Hybridization for HER-2 gene (FISH)
🗹 Cytology		🗹 Oncotype Dx (21-gene assay)
🗹 Haematoxylin & eosin section (H&E)		MammaPrint (70-gene microarray)
Surgical specimen		\Box Prediction Analysis of Microarray 50-gene set (PAM 50)
Sentinel node		Parameters included in the final pathology report
✓ Frozen section (FS)		🗹 Pathology stage (pT and pN)
Surgical specimen		🗹 Tumour size (invasive component in mm)
Sentinel node		🗹 Histologic type
✓ Immunohistochemistry stain (IHC)		🗹 Tumor grade
Strogen receptors		ER/PR receptor status
Progesterone receptors		V HER-2/neu receptor status
✓ HER-2		Peritumoural/Lymphovascular invasion
✓ Ki-67		Margin status

Medical Oncology

Dedicated Breast Medical Oncologists	2
Outpatient systemic therapy	
Clinical Research	

Radiotherapy

- Dedicated Radiation Oncologists
- Clinical Research

Available techniques after breast-conserving surgery (including experimental)

Whole-Breast RT (WBRT)

- Partial breast irradiation (PBI):
- 🗹 External beam PBI
- Interstitial brachytherapy

Targeted brachytherapy (MammoSite, SAVI applicator, other devices)

Intra-operative RT (IORT)

Multidisciplinary Meeting (MDM) / Tumour Board (TB)

Regular MDM/TB for case management discussion	Specialties/services participating in MDM/TB
Twice a week	Radiology
🗹 Weekly	Marast Surgery
Every two weeks	Reconstructive/Plastic Surgery
Other Schedule	M Pathology
Cases discussed at MDM/TB	Medical Oncology
Preoperative cases	Madiotherapy
	Genetic Counselling
M Postoperative cases	Marast Nurse Service
	🗹 Psycho-oncology

Further Services and Facilities

Nuclear Medicine

- V Lymphoscintigraphy
- 🗹 Bone scan
- Vertion Emission Tomography (PET)
- V PET/CT scan

Rehabilitation

- V Prosthesis service
- V Physiotherapy
- V Lymph-oedema treatment

Genetic Counselling

Specialist Providing Genetic Counselling/Risk assessment service:

- V Dedicated Clinical Geneticist
- Medical Oncologist
- Breast Surgeon
- General Surgeon
- Gynaecologist
- Genetic Testing available
- Surveillance program for high-risk women

Data Management

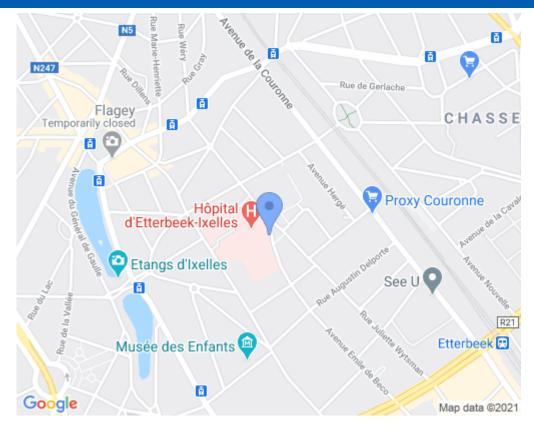

- ☑ Database used for clinical information
- 🗹 Data manager available
