

BREAST CENTRES NETWORK

Synergy among Breast Units

Instituto de Enfermedades de la Mama. FUCAM - Mexico, Distrito Federal, Mexico

General Information

New breast cancer cases treated per year **920**

Breast multidisciplinary team members **48**

Radiologists, surgeons, pathologists, medical oncologists, radiotherapists and nurses

Clinical Director: Sergio Rodríguez-Cuevas, MD

The “Instituto de Enfermedades de la Mama FUCAM” (Breast Diseases Institute FUCAM) is a breast specialized medical center in Mexico City founded in 2005 in which we take care of patients with breast diseases, mainly breast cancer. It is an open institute and we attend patients either coming from our breast cancer screening program or coming directly with breast disease. We yearly have over 50,000 screening mammograms with 6 mobile units. At FUCAM, we have a fully equipped X-rays department for minimally invasive biopsies and we offer breast conserving treatments, lymphatic mapping, intraoperative radiotherapy, external beam radiotherapy, immediate and delayed breast reconstruction, oncoplastic procedures, chemotherapy, psycho-oncology, pathology, nuclear medicine, genetic counseling and palliative care. We also offer a breast specialized training for radiologists, gynecologist and general surgeons.

CERTIFICATION(S) ACCREDITATION(S)

Comisión Federal para la Protección Contra Riesgos Sanitarios

Expiration date: 18 February 2019

Secretaria de Salud

Available services

- Radiology
- Breast Surgery
- Reconstructive/Plastic Surgery
- Pathology
- Medical Oncology
- Radiotherapy

- Nuclear Medicine
- Rehabilitation
- Genetic Counselling
- Data Management
- Psycho-oncology
- Breast Nurses

- Social Workers
- Nutritional Counselling
- Survivorship Groups
- Sexual Health Counselling
- Supportive and Palliative Care
- Integrative Medicine

Radiology

- Dedicated Radiologists** 10
- Mammograms per year** 50000
- Breast radiographers**
- Screening program**
- Verification for non-palpable breast lesions on specimen**
- Axillary US/US-guided FNAB**
- Clinical Research**

Available imaging equipment

- Mammography
- Ultrasound
- Magnetic Resonance Imaging (MRI)
- 3-D Mammography, 3-D Ultrasound

Available work-up imaging equipment

- Computer Tomography
- Ultrasound
- Magnetic Resonance Imaging (MRI)
- PET/CT scan
- X-Rays

Primary technique for localizing non-palpable lesions

- Hook-wire (or needle localization)
- Charcoal marking/tattooing
- ROLL: radio-guided occult lesion localization

Available breast tissue sampling equipment

- Stereotactic Biopsy (Mammography guided)
 - Core Biopsy (Tru-cut)
 - Vacuum assisted biopsy
- Ultrasound-guided biopsy
 - Fine-needle aspiration biopsy (FNAB, cytology)
 - Core Biopsy
 - Vacuum assisted biopsy
- MRI-guided biopsy
 - Core Biopsy
 - Vacuum assisted biopsy

Breast Surgery

- New operated cases per year (benign and malignant)** 1250
- Dedicated Breast Surgeons** 10
- Surgeons with more than 50 surgeries per year** 8
- Breast Surgery beds** 12
- Breast Nurse specialists** 18
- Outpatient surgery**
- Intra-operative evaluation of sentinel node**
- Reconstruction performed by Breast Surgeons**
- Clinical Research**

Primary technique for staging the axilla

- Axillary lymph node dissection
- Sentinel lymph node biopsy:
 - Blue dye technique
 - Radio-tracer technique
 - Blue dye + Radio-tracer
- Axillary sampling

Reconstructive/Plastic Surgery

- Reconstructive/Plastic surgeons** 1
- Immediate Reconstruction available**

Type of breast reconstructive surgery available

- Remodelling after breast-conserving surgery
- Reconstruction after mastectomy:
 - Two-stage reconstruction (tissue expander followed by implant)
 - One-stage reconstruction
 - Autogenous tissue flap
 - Latissimus dorsi flap
 - Transverse rectus abdominis (TRAM)
 - Free-flaps (free TRAM, DIEP, SIEA, gluteal, etc.)
- Surgery on the contralateral breast for symmetry

Pathology

- Dedicated Breast Pathologists** 3

Available studies

- Cytology
- Haematoxylin & eosin section (H&E)
 - Surgical specimen
 - Sentinel node
 - Core biopsy
- Frozen section (FS)
 - Surgical specimen
 - Sentinel node
- Immunohistochemistry stain (IHC)
 - Estrogen receptors
 - Progesterone receptors
 - HER-2
 - Ki-67

Other special studies available

- Fluorescence in-situ Hybridization for HER-2 gene (FISH)
- Oncotype Dx (21-gene assay)
- MammaPrint (70-gene microarray)
- Prediction Analysis of Microarray 50-gene set (PAM 50)
- Chromogenic In Situ Hybridization (CISH)

Parameters included in the final pathology report

- Pathology stage (pT and pN)
- Tumour size (invasive component in mm)
- Histologic type
- Tumor grade
- ER/PR receptor status
- HER-2/neu receptor status
- Peritumoural/Lymphovascular invasion
- Margin status
- lymph node, extracapsular invasion, DCIS component

Medical Oncology

- Dedicated Breast Medical Oncologists** 4
- Outpatient systemic therapy**
- Clinical Research**

Radiotherapy

Dedicated Radiation Oncologists

Clinical Research

Available techniques after breast-conserving surgery (including experimental)

Whole-Breast RT (WBRT)

Partial breast irradiation (PBI):

External beam PBI

Interstitial brachytherapy

Targeted brachytherapy (MammoSite, SAVI applicator, other devices)

Intra-operative RT (IORT)

Multidisciplinary Meeting (MDM) / Tumour Board (TB)

Regular MDM/TB for case management discussion

Twice a week

Weekly

Every two weeks

Other Schedule

Cases discussed at MDM/TB

Preoperative cases

Postoperative cases

Specialties/services participating in MDM/TB

Radiology

Breast Surgery

Reconstructive/Plastic Surgery

Pathology

Medical Oncology

Radiotherapy

Genetic Counselling

Breast Nurse Service

Psycho-oncology

fellows and residents

Further Services and Facilities

Nuclear Medicine

Lymphoscintigraphy

Bone scan

Positron Emission Tomography (PET)

PET/CT scan

Rehabilitation

Prosthesis service

Physiotherapy

Lymph-oedema treatment

group of cancer survivors

Genetic Counselling

Specialist Providing Genetic Counselling/Risk assessment service:

Dedicated Clinical Geneticist

Medical Oncologist

Breast Surgeon

General Surgeon

Gynaecologist

Genetic Testing available

Surveillance program for high-risk women

Data Management

Database used for clinical information

Data manager available

Web-site: www.fucam.org.mx

From airport:

Take a taxi and ask for FUCAM in Tlalpan, near to the Soccer Azteca Stadium or near to 'prepa 5'.

By train:

Not available.

By bus or sub-way/underground:

Take the subway to Taxqueña station, and then take the 'Tren ligero' to 'El Vergel' Station.

By car:

Very near from PERIFERICO SUR and VIADUCTO-TLALPAN. In the South of the city.
