## **General Information**

New breast cancer cases treated per year 350

Breast multidisciplinarity team members 14

Radiologists, surgeons, pathologists, medical oncologists, radiotherapists and nurses

Clinical Director: Alessandro Sanguinetti, MD

Our Breast Unit deals with surgical treatment of benign and malignant breast diseases. The activity includes surgical oncology demolition (radical and conservative), interventions for malformations to benign and/or inflammatory disease and male breast (gynecomastia and cancer). The collaboration with the Plastic Surgery Department of Santa Maria di Terni Hospital pays particular attention to post-mastectomy breast reconstructive surgery, breast surgery and to remodeling the contralateral symmetrization after conservative surgery. We also carry out cosmetic surgery (breast augmentation, mastopexy and reductive) under professional services. From an organizational perspective, the diagnostic and therapeutic approach is performed in a single defined path by the Multidisciplinary Group. Therapeutic choices and settings of care plans are discussed and shared in weekly meetings. Scientific activity is carried out regularly. We also have set up a working group that deals with the placement of central venous catheters with peripheral insertion echoguided. Its activities are performed in an outpatient department.

## Available services

- ✓ Radiology
- ✓ Breast Surgery
- ☑ Reconstructive/Plastic Surgery
- ✓ Pathology
- Medical Oncology

✓ Clinical Research

✓ Radiotherapy

- ✓ Nuclear Medicine
- Rehabilitation
- ✓ Genetic Counselling
- ✓ Data Management
- ✓ Psycho-oncology
- ✓ Breast Nurses

- ✓ Social Workers
- ✓ Nutritional Counselling
- ✓ Survivorship Groups
- Sexual Health Counselling
- ☑ Supportive and Palliative Care
- ✓ Integrative Medicine

## Radiology

- ✓ Dedicated Radiologists
   ✓ Mammograms per year
   ✓ Breast radiographers
   ✓ Screening program
   ✓ Verification for
   non-palpable breast lesions
   on specimen
   ✓ Axillary US/US-guided
   FNAB
- Available imaging equipment Mammography Ultrasound Magnetic Resonance Imaging (MRI) Magnetic Resonance Imaging 3 Available work-up imaging equipment Computer Tomography ✓ Ultrasound ✓ Magnetic Resonance Imaging (MRI) ✓ PET/CT scan Primary technique for localizing non-palpable lesions ☐ Hook-wire (or needle localization) ☐ Charcoal marking/tattooing ROLL: radio-guided occult lesion localization
- Available breast tissue sampling equipment

  Stereotactic Biopsy (Mammography guided)
  Core Biopsy (Tru-cut)
  Vacuum assisted biopsy
  Ultrasound-guided biopsy
  Fine-needle aspiration biopsy (FNAB, cytology)
  Core Biopsy
  Vacuum assisted biopsy
  MRI-guided biopsy
  Core Biopsy
  Core Biopsy
  Core Biopsy
  Vacuum assisted biopsy

## **Breast Surgery**

✓ New operated cases per year (benign and malignant)
350

✓ Dedicated Breast Surgeons
4

✓ Surgeons with more than 50 surgeries per year
2

✓ Breast Surgery beds
6

✓ Breast Nurse specialists
2

✓ Outpatient surgery

✓ Intra-operative evaluation of sentinel node

✓ Reconstruction performed by Breast Surgeons

✓ Clinical Research

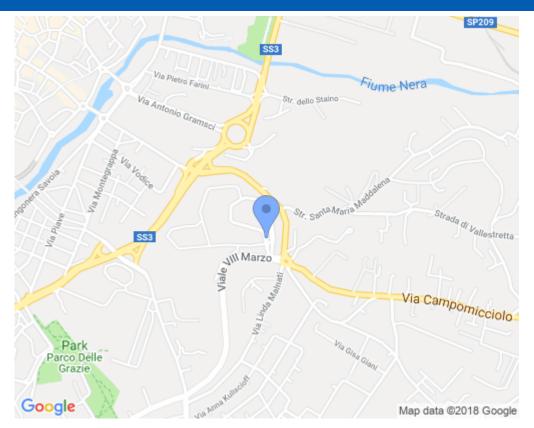

# Primary technique for staging the axilla Axillary lymph node dissection Sentinel lymph node biopsy: Blue dye technique Radio-tracer technique Blue dye + Radio-tracer Axillary sampling

## Reconstructive/Plastic Surgery Reconstructive/Plastic surgeons Type of breast reconstructive surgery available Immediate Reconstruction available Remodelling after breast-conserving surgery ☑ Reconstruction after mastectomy: Two-stage reconstruction (tissue expander followed by implant) ☑ One-stage reconstruction Autogenous tissue flap Latissimus dorsi flap ✓ Transverse rectus abdominis (TRAM) ☐ Free-flaps (free TRAM, DIEP, SIEA, gluteal, etc.) ☑ Surgery on the contralateral breast for symmetry **Pathology** Dedicated Breast Pathologists 2 Other special studies available Available studies ✓ Fluorescence in-situ Hybridization for HER-2 gene (FISH) Cytology ✓ Oncotype Dx (21-gene assay) ✓ Haematoxylin & eosin section (H&E) ☐ MammaPrint (70-gene microarray) ✓ Surgical specimen Prediction Analysis of Microarray 50-gene set (PAM 50) ✓ Sentinel node Parameters included in the final pathology report Core biopsy ✓ Pathology stage (pT and pN) ✓ Frozen section (FS) ✓ Tumour size (invasive component in mm) ✓ Surgical specimen Mistologic type ☐ Sentinel node ✓ Tumor grade ✓ Immunohistochemistry stain (IHC) ✓ ER/PR receptor status Estrogen receptors ✓ HER-2/neu receptor status Progesterone receptors Peritumoural/Lymphovascular invasion ☑ HER-2 Margin status ✓ Ki-67 **Medical Oncology** ✓ Dedicated Breast Medical Oncologists 3 Outpatient systemic therapy Clinical Research

<ul><li>✓ Dedicated Radiation Oncologists</li><li>✓ Clinical Research</li></ul>	Available techniques after breast-conserving surgery (including experimental)
	₩ Whole-Breast RT (WBRT)
	✓ Partial breast irradiation (PBI):
	External beam PBI
	☑ Interstitial brachytherapy
	☑ Targeted brachytherapy (MammoSite, SAVI applicator, other devices)
	☐ Intra-operative RT (IORT)
ultidisciplinary Meeting (MDM) / Tumour Board (	тв)
Regular MDM/TB for case management discussion	Specialties/services participating in MDM/TB
☐ Twice a week	✓ Radiology
<b>☑</b> Weekly	✓ Breast Surgery
Every two weeks	✓ Reconstructive/Plastic Surgery
Other Schedule	✓ Pathology
Cases discussed at MDM/TB	✓ Medical Oncology
<b>∀</b>	✓ Radiotherapy
Preoperative cases	☑ Genetic Counselling
✓ Postoperative cases	✓ Breast Nurse Service
	Psycho-oncology
ırther Services and Facilities	
Nuclear Medicine	Genetic Counselling
☑ Lymphoscintigraphy	✓ Specialist Providing Genetic Counselling/Risk assessment
☑ Bone scan	service:  Dedicated Clinical Geneticist
☑ Positron Emission Tomography (PET)	✓ Medical Oncologist
PET/CT scan	☐ Breast Surgeon
Rehabilitation	General Surgeon
☑ Prosthesis service	Gynaecologist
✓ Prostriesis service  ✓ Physiotherapy	Genetic Testing available
✓ Friysiotilerapy  ✓ Lymph-oedema treatment	Surveillance program for high-risk women
E Lymph ocachia treatment	Data Management
	✓ Database used for clinical information
	☑ Data manager available
