

BREAST CENTRES NETWORK

Synergy among Breast Units

Groupe Hospitalier Avicenne-Jean Verdier, CHU de Paris-Seine-Saint-Denis - Bobigny, France

General Information

New breast cancer cases treated per year	220
Breast multidisciplinarity team members	13
Radiologists, surgeons, pathologists, medical oncologists, radiothera nurses	pists and

The unit is located in Seine Saint Denis, 4 km away from Paris. Our aim is to become a reference center for the 1.5 million people living in this area which are among the most underprivileged in France. Besides our commitment in breast diseases, we are especially intersted in cancer survivorship research. We offer nutritional education for cancer survivors, physical activity and social support. Furthermore, we began a specific training for sports teachers who wish to take in charge cancer patients.

Breast Surgery

New operated cases per year (benign and malignant)	220
Z Dedicated Breast Surgeons	5
Surgeons with more than 50 surgeries per year	3
☑ Breast Surgery beds	10
🗹 Breast Nurse specialists	1
☑ Outpatient surgery	
Intra-operative evaluation of sentinel node	
Reconstruction performed by Breast Surgeons	
V Clinical Research	

Primary technique for staging the axilla

- Axillary lymph node dissection
- Sentinel lymph node biopsy:
- Blue dye technique
- Radio-tracer technique
- ✓ Blue dye + Radio-tracer
- Axillary sampling

Reconstructive/Plastic Surgery

Immediate Reconstruction available	1 Type of breast reconstructive surgery available
	Remodelling after breast-conserving surgery
	Reconstruction after mastectomy:
	\checkmark Two-stage reconstruction (tissue expander followed by implant)
	One-stage reconstruction
	🗹 Autogenous tissue flap
	🗹 Latissimus dorsi flap
	V Transverse rectus abdominis (TRAM)
	🗹 Free-flaps (free TRAM, DIEP, SIEA, gluteal, etc.)

Pathology

V Dedicated Breast Pathologists	1 Other special studies available
Available studies	V Fluorescence in-situ Hybridization for HER-2 gene (FISH)
V Cytology	🗹 Oncotype Dx (21-gene assay)
🗹 Haematoxylin & eosin section (H&E)	MammaPrint (70-gene microarray)
Surgical specimen	Prediction Analysis of Microarray 50-gene set (PAM 50)
Sentinel node	M OncoPredict
V Core biopsy	Parameters included in the final pathology report
 Frozen section (FS) Surgical specimen 	Pathology stage (pT and pN)
Sentinel node	🗹 Tumour size (invasive component in mm)
🗹 Immunohistochemistry stain (IHC)	Iistologic type
Estrogen receptors	🗹 Tumor grade
Progesterone receptors	ER/PR receptor status
HER-2	HER-2/neu receptor status
 ✓ Ki-67 	Peritumoural/Lymphovascular invasion
•.	Margin status
	✓ Ki67

Medical Oncology

- Z Dedicated Breast Medical Oncologists 3
- Outpatient systemic therapy
- Clinical Research

Radiotherapy

- Dedicated Radiation Oncologists
- Clinical Research

Available techniques after breast-conserving surgery (including experimental)

Whole-Breast RT (WBRT)

- Partial breast irradiation (PBI):
- External beam PBI
- Interstitial brachytherapy

Targeted brachytherapy (MammoSite, SAVI applicator, other devices)

□ Intra-operative RT (IORT)

Multidisciplinary Meeting (MDM) / Tumour Board (TB)

Regular MDM/TB for case management discussion	Specialties/services participating in MDM/TB	
Twice a week	🗹 Radiology	
🗹 Weekly	Margery Breast Surgery	
Every two weeks	Reconstructive/Plastic Surgery	
Other Schedule	Pathology	
Cases discussed at MDM/TB	Medical Oncology	
	🗹 Radiotherapy	
Preoperative cases	Genetic Counselling	
Postoperative cases	Breast Nurse Service	
	Psycho-oncology	

Further Services and Facilities

Nuclear Medicine

- V Lymphoscintigraphy
- 🗹 Bone scan
- Positron Emission Tomography (PET)
- V PET/CT scan

Rehabilitation

- V Prosthesis service
- Physiotherapy
- V Lymph-oedema treatment

Genetic Counselling

Specialist Providing Genetic Counselling/Risk assessment service:

- V Dedicated Clinical Geneticist
- Medical Oncologist
- Breast Surgeon
- General Surgeon
- Gynaecologist
- Genetic Testing available
- Surveillance program for high-risk women

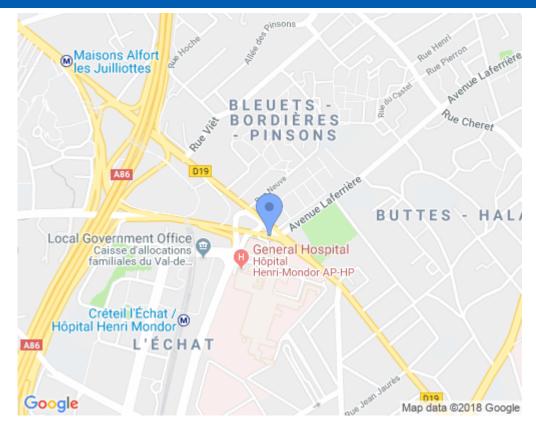

Data Management

- ☑ Database used for clinical information
- 🗹 Data manager available
