Clinical Director: Juan L. Uriburu, MD

Buenos Aires British Hospital was founded in 1844, and its Breast Diseases Department was created in 1979. It is located in Buenos Aires Capital City and is integrated by a multidisciplinary group that takes care of 15,500 outpatient visits annually. We aim to detect breast diseases at the early stages, which results in less aggressive treatments. Our distinctive role is oncoplastic surgery, not only for breast-conserving treatment but also for radical surgery. It is a University Hospital and also has a Fellowship Programme to obtain the Certificate in Breast Care.
